LANGUAGES / SKILLS

Frontend: TypeScript, React, React Native, JavaScript, TailwindCSS, Next.js, Python
Backend: REST APIs, Node.js, SQL (PostgreSQL), NoSQL (MongoDB), Redis, Kafka
Testing: Playwright, Appium, Cucumber, Jest, Apidog, Page Object Models (POM)
DevOps: Docker, Kubernetes, CI/CD, Linux, ARM, Sentry, Datadog, Git, Version
Workflows: Agile, Jira/ClickUp, Gitflow, Root Cause Analysis (RCA), Collaboration

WORK EXPERIENCE

Software Engineer - Ecco, Inc. - Los Angeles, CA
Sept 2025 - May 2026

- Built a TikTok-style infinite scroll for recommended movies and tv shows on the feed across mobile and web with TypeScript, React, and React Native

- Wrote documentation for the QA process and environment setup to help cut down new engineers onboarding time down from weeks to days

- Participated in volunteer on-call rotation and resolved a critical Weaviate failure preventing database from starting, requiring cluster restoration and code update. Restored service within 2 hours of disruption for 10,000+ users

- Built cross-platform E2E automation framework and CI/CD pipeline that cut production errors by 90% by preventing regressions and sped up release testing from multiple days to hours

Consulting - Natick, MA
May 2026 - Present

- Reduced costs for enterprise LLM code generation by 20% through migration to an on-premises Kubernetes cluster following benchmarking of 50-Series, Blackwell, and Hopper Nvidia GPUs on CoreWeave

- Designed a real-time Prometheus and Grafana dashboard with an alerting system that detects and flags OOM errors and thermal throttling bottlenecks, reducing cluster downtime by 15%

- Engineered a multi-GPU distributed workloads on Linux using Vulkan to pool resources and optimize utilization across clustered hardware, accelerating concurrent LLM agent performance by 25%

PROJECTS

The Gist - https://github.com/parkhurstcolin/News-Project

News collection app built with Vite featuring data ingestion with real news sources and storing inside PostgreSql database - Running inside Docker

Flipper - https://parkhurstcolin.github.io/Flipper/

Movie recommendation app built with React featuring infinite scroll, state management, and REST API integration - deployed via GitHub Pages

HomeLab -

Multi-architecture (ARM/x86) home cluster running Kubernetes and Docker with NAS storage integration. Kafka, Redis, MongoDB

AWARDS

Business Professionals of America(State Conference):

Cisco System Administration

3rd Place - 2011

2nd Place - 2012

Computer Security

4th Place - 2011

Computer Network Technology

3rd Place - 2012

EDUCATION

Joseph P. Keefe Technical School, Framingham, MA: *Diploma*

Sophomore Year: A+ Certification

Junior Year: Cisco CNA Parts 1 + 2

Senior Year: Cisco CNA Parts 3 + 4

Regis College, Weston, MA,

Machine Learning with Python:

Oct 2026 - Present

HOBBIES

Computer Networking

Localized Homelab:

- 4x Raspberry Pi 16gb

- 1x Intel 7700K 64gb

Studying History

Video Games
